# MIKKELSEN AND SONS GREENHOUSES

## CHRYSANTHEMUMS 1953 PRICE LIST

P.O. BOX 1536

WEST END STATION

ASHTABULA, OHIO

MIKKELSEN & SONS GREENHOUSES  
Ashtabula, Ohio

Our stock plants are grown in sterilized soil and the cuttings are rooted in sterilized sand and peat. All stock plants and cuttings are under the influence of incandescent lights from August 1st to May 15th and are grown under automatically controlled temperatures.

The following information is given as a guide for the cultural practices as listed and are not hard and fast rules for any particular operation:

LIGHTS

8, 9 and 10 week varieties should be lighted from August 1st to May 1st to 15th if bud initiation is to be prevented and providing the plants are grown at 60° maximum. 11 week varieties should be lighted August 15th to April 15th or May 1st. 12, 13 and 14 week varieties should be lighted September 1st to April 1st to the 15th. One to two hours of light during August should be sufficient, increasing to three hours during September, four hours during October and five hours during the months of November and December and then diminishing during January to four hours, March to three and April to two and one.

SHADING

8, 9 and 10 week varieties must be shaded from April 1st to September 15th to insure response to bud initiation. 11 week varieties should be shaded March 15th to October 1st, and 12, 13, and 14 week varieties should be shaded from March 1st to October 15th.

SPACING

Pompons bloomed during November, December and January should have 32 sq. in. per stem. October, February and March require about 28 sq. in. per stem, and any Pompons flowered from April through September should have about 24 sq. in. per stem. Spacing on Mums for the same periods would require respectively 36, 32 and 28 sq. in. per flower.

WARRANTY

All stock is sold without warranty, express or implied, of description, quality, productivity or otherwise. All liability for your crop is hereby disclaimed.

DISCOUNTS ALLOWED ON ROOTED CHRYSANTHEMUM CUTTINGS

MIKKELSEN & SONS GREENHOUSES

2% discount if current invoice is paid in 10 days.

2% discount if order is placed 6 months prior to shipping.  
(We will allow 4 months through July 15, 1952 only)

1% discount for continuity of order.  
Continuity to mean the regular planting of varieties over a period of time rather than a large amount of one variety for only one planting. This discount will be at our discretion.

5% discount if total order is 10 to 25 thousand rooted cuttings.

10% discount if total order is 25 to 50 thousand rooted cuttings.

15% discount if total order is 50 to 100 thousand rooted cuttings.

20% discount if total order is over 100 thousand rooted cuttings.

Thus if an order for 100 thousand cuttings were to be placed 6 months in advance and calls for varieties to be used in somewhat constant amounts at regular intervals and current invoices are paid in 10 days, a total of 25% discount from the price schedule would be given. Similarly, corresponding amounts, if less than 100 thousand are ordered, would be allowed.

PRICE SCHEDULE PER 100 OF ANY ONE VARIETY

<u>Per 100</u>	<u>101 - 500</u>	<u>501 - 1000</u>	<u>1001 - 2500</u>	<u>2501 up</u>

ORDERS SHIPPED RAILWAY EXPRESS UNLESS REQUESTED OTHERWISE

This sheet effective with shipments beginning Oct. 1, 1952.

### 1953 INTRODUCTIONS

ILLINI IGLOO-- Intermediate button-type pompon; creamy white; 2" in diameter; flower almost globular in shape; full center; the substance is exceptional. A 10-week variety blooming November 10.

ILLINI SUNSPOT-- Large button-type pompon; deep yellow;  $2\frac{1}{2}$ " in diameter in spray;  $2\frac{3}{4}$  to 3 inches as a disbud or partial disbud; a little small as a disbud; possibly at its best as a partial disbud; full center; almost globular in form; substance exceptional; well placed sprays rather compact; stems very heavy and stiff; not a tall grower, but tall enough. An 11-week variety blooming November 20.

ILLINI TANGIER-- Large informal decorative; rusty red-bronze;  $2\frac{1}{2}$  to 3" in diameter in spray form; florets rather narrow and pointed at ends and somewhat reflexed. Substance good. Stems very heavy; tall grower. An 11-week variety blooming November 15.

ILLINI YELLOW SNOWBOUND-- Large informal decorative; soft light yellow; 3" in diameter; flowers are rather flat; florets taper to end and are slightly reflexed. Tends to have very large sprays; stems stiff; not a tall grower; 45". A 15-week variety blooming January 10.

NOTE: If a variety is desired that we do not list, kindly consult us at least 6 months in advance of the shipping date and every effort will be made to secure stock of that variety before the order is acknowledged.
